Seventh Symposium on

Trends in Functional Programming

19-21 April 2006, Nottingham, UK

TFP 2006

The *Symposium on Trends in Functional Programming* (TFP) is an international forum for researchers with interests in all aspects of functional programming languages, focusing on providing a broad view of current and future trends in Functional Programming. It aspires to be a lively environment for presenting the latest research results through acceptance by extended abstracts. A formal post-symposium refereeing process then selects the best papers presented at the symposium for publication in a high-profile volume.

TFP 2006 is going to be held in Nottingham, UK, 19 - 21 April, co-located with Types 2006 (18 - 21 April) and the Spring School on Datatype-Generic Programming (24 - 27 April).
