Н_	Thus, I came to the conclusion that the		
	designer of a new system must not only		
	be the implementer and first large—scale		
	user; the designer should also write the		
-	first user manual.		
	The separation of any of these four com-		
	ponents would have hurt TEX significant	y.	
H_	If I had not participated fully in all these		
н_	activities, literally hundreds of improve-		
	ments would never have been made, be-		
	cause I would never have thought of them		
	or perceived why they were important.		
	But a system cannot be successful if it is		
	too strongly influenced by a single per-		
	son. Once the initial design is complete		
	and fairly robust, the real test begins as		
	people with many different viewpoints		
<u>H.</u>	undertake their own experiments.	<u></u>
