

ConTeXt 2023.09.04 19:15

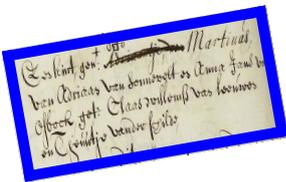

Problem:

it looks like `\rotate[]{}{}` kills the definition of `boxtitlecolor`. Changing the names of the `titlecolor`/`framecolor` definitions makes no difference.

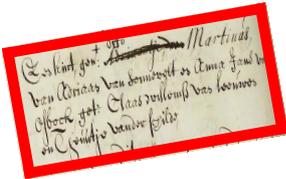

Why is this? ConTeXt error?

norotation: title color is blue

rotation: title color should be blue but is not

rotation: title color different from framecolor now blue
