

Part 2: Short	The bug is here.
Part 4: Rather longer label	The bug is here.
Part 5: Rather longer label	Hello there.
Part 5:	
Part 7: Rather longer label	The bug is here.
Part 8: Rather longer label	Seems okay.
Part 8: Rather longer label	Definitely okay!
Part 9: Rather longer label	The bug is here.
Part 11: Rather longer label	The bug is here.

Hello, ConT_EXt! Thus, I came to the conclusion that the designer of a new system must not only be the implementer and first large-scale user; the designer should also write the first user manual.

The separation of any of these four components would have hurt T_EX significantly. If I had not participated fully in all these activities, literally hundreds of improvements would never have been made, because I would never have thought of them or perceived why they were important.

But a system cannot be successful if it is too strongly influenced by a single person. Once the initial design is complete and fairly robust, the real test begins as people with many different viewpoints undertake their own experiments.
